

## SCIENCE AND ENGINEERING LABS FOR THE UNIVERSITY OF GHANA

### \$1,700,000 turnkey project, including:

- Equipment supply for 10 departments
- Equipment installation and commissioning

Eagle Scientific Ltd supplied equipment for a diverse range of laboratories in the University of Ghana. Equipment was delivered and installed for the following 10 departments, situated throughout the University:

- Pharmacology
- Nursing
- Crop Sciences
- Agricultural Engineering
- Biomedical Engineering
- Computer Engineering
- Materials Science
- Food Process Engineering
- Engineering Workshop
- Geology

The equipment included in the project was diverse, ranging from research level analytical equipment for post-graduate study (such as x-ray and infra-red spectrometers) through to heavy engineering equipment such as lathes and CAD/CAM mills, as well as trainers for subjects such as robotics and food technology. In total, equipment from more than 200 manufacturers was consolidated, delivered and installed as a coherent whole.
